

MAXIMIZING PRODUCTIVITY AND MARGINS

SEE THE BIGGER PICTURE

The InEight integrated solutions platform delivers a higher level of visibility, so you maintain complete situational awareness of your projects with historical context. You get greater control, leveraging connected data and integrated processes to effectively manage change and risk across projects. You'll also have greater confidence, ensuring projects are completed on time and on budget. Manage better outcomes with InEight and realize proven project certainty.

InEight helps your teams get more done in a day, improving project margins. Our connected solutions ensure you spend more time making decisions and acting on them, and less time gathering data and massaging disconnected spreadsheets. You'll eliminate surprises because you have complete control of project costs. You'll know "where that number came from" because you're getting daily earned value metrics that allow you to drill into cost performance details. And – you'll take forecasting accuracy to a higher level because you're getting the most current progress information.

DISCOVER THE BENEFITS OF CONNECTED SOLUTIONS THAT STREAMLINE YOUR BUSINESS PROCESSES

Achieve greater accuracy by leveraging flexible, feature-rich estimating software.

- Gain increased confidence in your estimates because you have the appropriate level of detail for each stage of a project
- Better leverage your organizational history by validating new estimates with data-driven insights and benchmarks
- Increase your estimating team's efficiency with software that ensures consistency and standardization

Create accurate forecasts and budgets based on real-time metrics.

- Ensure budgets, forecasts and schedules stay in alignment by creating time-phased budgets
- Continually assess project cost performance leveraging budgets and forecasts created by as-builts and work progress (percent complete)
- Deal with change collaboratively as change-order workflows show how each change affects the project's current budget

Get a 360-degree view of your project's health.

- Get an objective view of the value of work delivered
- Have confidence in your percent complete and how it was calculated
- Avoid the traps that arise from looking at cost- or schedule-related EVM metrics individually
- Effectively monitor costs, schedules, work hours and other KPIs with minimal effort and a higher degree of efficiency

Improve your team's field productivity immediately without extensive training.

- Clearly communicate the daily plan to crews and subcontractors so everyone knows what to focus on
- Stay focused on the work (not paperwork) by getting full visibility with simplified daily reporting
- Ensure your field teams spend less time doing administrative chores and more time delivering quality work
- Gain simplified progress reporting that speeds up billing cycles

SPEND LESS TIME PRODUCING EARLY-STAGE ESTIMATES

REDUCE THE TIME YOU SPEND GENERATING COST REPORTS

INTEGRATE BUDGETS AND SCHEDULES FOR EVM FASTER

REDUCE THE TIME YOU SPEND PREPARING DAILY REPORTS
